candle holder, glass selection

Dear glass friend,
put accents - with stained glass!

Harmony from light and color transfered to modern design

The materials used here are a guarantor
for an especially noble charisma:
Beveled glass in combination with its semi-gloss to noble
gleaming iridescent surface known glasses from Bullseye and
glasses from the row Mardi Gras.

Allow yourself something special

Get free download of all design patterns - more practically it hardly goes.

As an assistance with the glass choice find here an extensive overview.

enjoy the job

your Markus Klein

Before you immediately start, please follow these tips:

Tip for the glass choice:

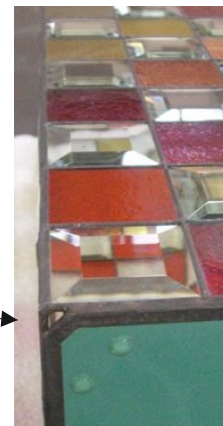

The glasses Bullseye 1025-31F, 1120-31F, 1122-31F, 1125-31F, 1305-31F, 1311-31F, 1320-31F, 1322-31F and 1332-31F belong to the group of striking colors. The cold sheet in some cases has not reached the target color - to get the target color the glass needs to be fired at approx. 800°C and glass specific cooled down. Ask your dealer for the color of the cold sheet - very often this comes already in the target color.

Working tip to the candle holder:

You should stabilise the big candle holder at the upper edge with a soldered brass rod (1 mm).

For all candle holder:

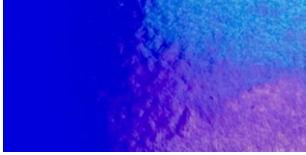

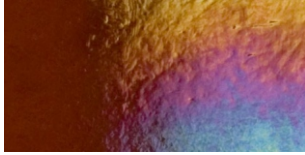

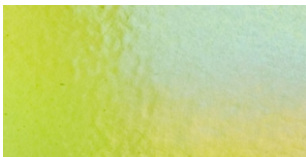

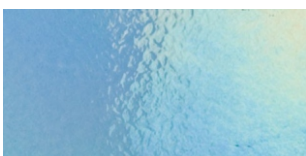

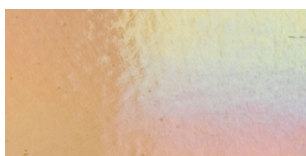

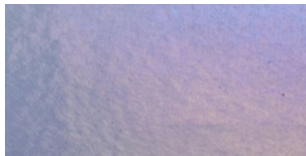

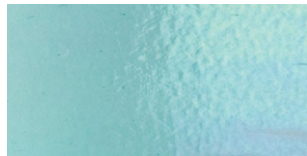

Craft small openings in the base plate at the corners, so that the candle flame is supplied later from below with air.

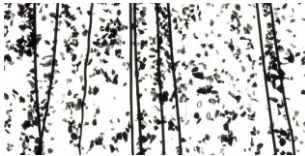

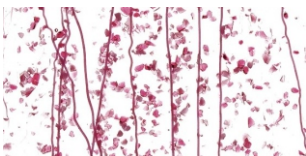

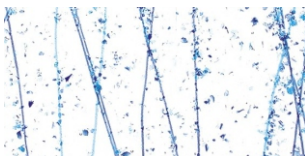

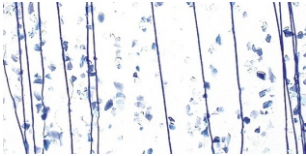

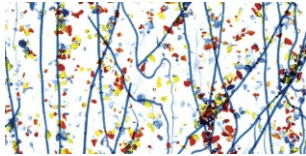

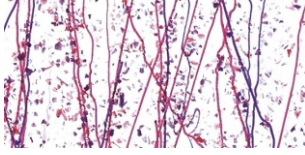

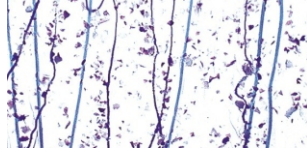

Bullseye's transparent iridescent glass and Bullseye's Mardi Gras line - glass of first choice for candle holder.

			
Bullseye 1101-31 F clear	Bullseye 1101-25 F clear ripple	Bullseye 1437-31 F pale amber	Bullseye 1120-31 F light yellow
