

Candle Holder - Tulip

© www.inspiration-for-glass.com

Candle holder "tulip" approx. 12 x 21 cm / 5" x 8"

Material for one candle holder:

4 bevel sets HiLite HS-6 (8570206)

4 glass pieces rectangle 12 x 21 cm

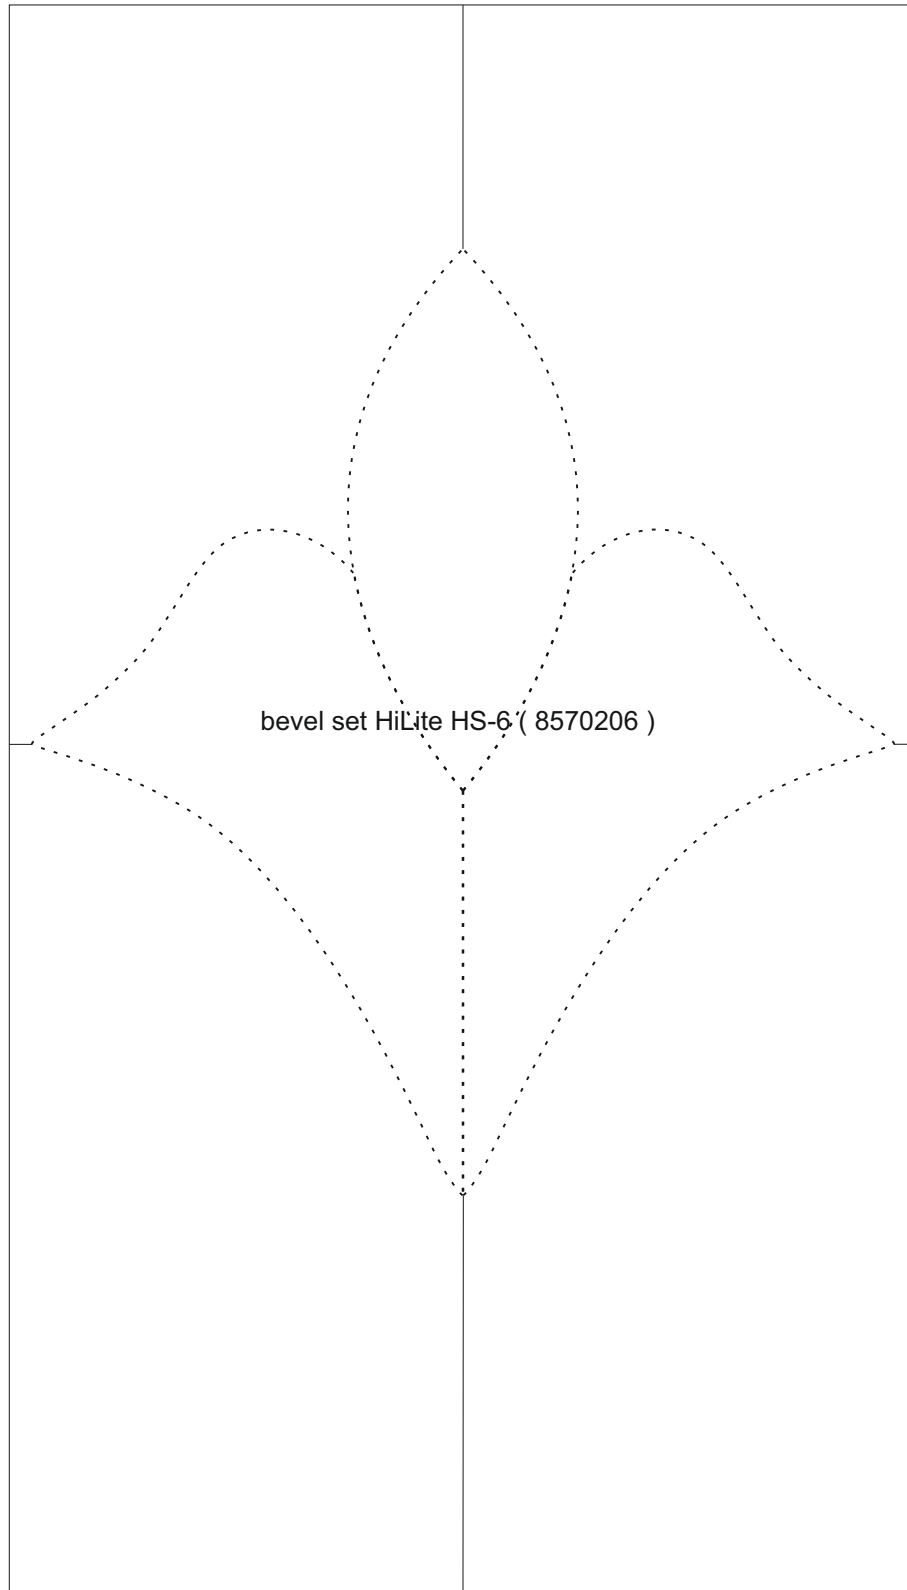

mirror for the bottom

In the example used glass:

Uroboros 11-38

Original size

120 x 210 mm

First step would be to solder the bevel sets ready. Now separate four stained glass rectangles according to measurement method. Place the bevel set on the cut glass rectangle and trace the edges of subjects. This is now your pattern. Only through this way, will the pieces of glass and soldered seams be exact, since the facets always vary easily. See also detailed instructions for the candlesticks "starlight L"
