# Suncatcher „ disc “

Little effort - great effect! Good mood in the tree and or bush - there, look here ...

Some accents in colored glass

more color examples

...and that's how also in your garden will hang a few suncatcher soon model „ disc “...

Cut a few colored glass circles. The circles shown here have a diameter between 15 and 30cm ( 6" to 12" ). I recommend transparent colored glass.

For the suspension drill or grind a 3-6mm ( 1/8 - 1/4" ) hole with at least 3cm ( 1" ) distance from the outer edge of the circle.

!!! Deburr the cut edge with a whetstone for glass. Also suitable is wet sandpaper (grain size about 120) for deburring the cut edge.

In principle, the sun catcher is ready now..

For safety you can coat the glass circle with a clear anti-splinter tape.

Attention

- these sun-catcher will be noticed !  
If your friends see this you may certainly have to cut a few more circles and drill some more holes.

also a great gift for garden lovers...
