Bring some color to your wall, flashy but harmonizingly adjusted!

Fresh colored accents made from transparent glass, embedded in a colorless structure of glass.

Surrounded by colorless structures of glass, the colorful translucent parts throw a colored shadow onto the wall.

The colors are strong and very intense. This brings out the character, of the wall decoration.

For this type of glass design, you want to use the structured colored glass out of the ``RR`` series from Spectrum.

This would be the best selection, and using Spectrum 100K as a background would be an absolute classic.

Material used in the original pictures:
