At this length of the candle light you please stabilize the top seam with a 3x3mm brass U-shaped profile.

Without the extra profile the copperfoil might peel off, for example when cleaning..

Bottom cut from mirror

I recommend to coat the mirror edge with mirror protection varnish. It is also useful to make the copper foil overlap at the mirror's coated side a little wider.

After the final cleaning of the light I recommend to paint the bottom - this looks more professional than the usual mirror coating.

The rubber bumps ensure the perfect stand even on sensitive ground.
