

# Glass Lamp small - Wonderful Glass

© [www.inspiration-for-glass.com](http://www.inspiration-for-glass.com)

Want to go on vacation?  
Beach - sea - romantic sunsets ?  
This light in front of your eyes - pure magic - vacation!

In the example I used glass from Youghioghenny, the alabaster-like or waxy - Stipple glass, 1567SP - blue green yellow pink waxy white.

Through the opal - alabaster-like glass from Youghioghenny the illuminant is not visible.....  
The light is beautifully evenly distributed over the shade.

Even if the stand is not illuminated from the inside, the colors are bright in the natural light.  
Do you recognize the color flow? ..on the beach...

This design requires accurate work, but is also suitable for beginners, because only a few parts are connected.  
Good luck!

Important, do not forget the cable outlet.

Final, brass ball 16mm  
with adapter from 1/4" to M10  
2113000 and 2430100  
Lamp cap 4-cornered  
42x42mm
