

Greenhouse Pyramid 6 sides

© www.inspiration-for-glass.com

detail

The top and the bottom bowl are made up of six repetitions. The middle segment consists of only five glass parts. This creates a large opening in front. So you can plant, care for and look at the planted bowl comfortably.

Just glue some rubber pumps under the floor. The rubber bumps prevent scratches or other marks on sensitive surfaces.

This plant house is about 31 cm high and 22 cm in diameter.
