In this example used glasses:

top + 2 stripes (A + C + E):
Bullseye 1101-43F, clear iridescent, reed texture

dark segments (B + D + F):
Bullseye 0100-37F, black, silver-iridescent coated

4 repeats :

B

C

D

E

F

example from Spectrum 1009 Chord 6mm

The light base 19 x 19 cm

The size of the light base is 19 x19 cm,
with a 12mm drilled hole in it's middle.

The edges of the base can be covered with copper foil and soldered around - however, does not have to.
If you have cut the sheet carefully enough a most lightly deburring of the sharp edges should be fine (mainly with a grinding pad).
Also see detailed description to the construction of the light base.
