

Room design - **Daisy** - Original size approx. 60 cm / 24"

"A small splash of color in the living area ...

Daisies - A refreshing change to green meadows, with their bright yellow core and pure white petals.

Get this beauty of the summer home, in capturing a mural, made □□ of glass.

The semi-transparent, slightly textured on the back, Spectrum 6000-81CC is ideal for the making of the petals. The absolute highlight of the flower center: Dichroic coated black Ripple glass.

This type of dichroic gives out, depending on the light and perspective, quite different Impressions and effects. This is something you should treat yourself to.

For gentle color coordination, I have patinated the solder seams in copper-colors.

Overall this is a glass work, which exudes a climate-friendly summerly flavor.

Material:

Spectrum 6000-81 CC, pearl white
Dichroic 3534218 (UBGR-CY)
